First Action on the Merits

1. Claims 1-9 of U.S. Application 10/519,059 filed on 12/22/2004 are presented for examination.

Quotations of U.S. Code Title 35

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. The claims and only the claims form the metes and bounds of the invention. “Office personnel are to give claims their broadest reasonable interpretation in light of the supporting disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir 1997). Limitations appearing in the specification but not recited in the claim are not read into the claim. In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ541, 550-551 (CCPA 1969)” (MPEP p2100-8, c 2, I 45-48; p 2100-9, c 1, I 1-4). The Examiner has full latitude to interpret each claim in the broadest reasonable sense. The Examiner will reference prior art using terminology familiar to one of ordinary skill in the art. Such an approach is broad in concept and can be either explicit or implicit in meaning.

Art Unit: 2121

Information Disclosure Statement

4. The information disclosure statements (IDS) submitted on 12/22/2004 and 01/25/2007 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Objections

5. Claim 1 is objected to because of the following informalities: the term “the method comprises” in line 6 does not seem to be appropriately repeated after the first “the method comprising” at line 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,555,966 (“Pitigoi-Aron”).

Regarding claims 1 and 6, Pitigoi-Aron teaches a method and system for controlling an ambient light (see abstract), the method comprising: receiving main data and additional data by a receiver (see C 1 L 43-49); setting a property of the ambient light based upon the additional data characterized in that the additional data comprises descriptive information about the main data and the method comprises filtering this descriptive information from the additional data and setting the property of the ambient light based upon the descriptive information (see C 2 L 48-63).

Regarding claims 2 and 7, Pitigoi-Aron teaches presenting the main data by a presentation device and setting the property of the ambient light that is in proximity of the presentation device (see C 5 L 19-36).

Regarding claims 3 and 8, Pitigoi-Aron teaches wherein setting the property of the ambient light is substantially synchronously with presenting the main data by the presentation device (see C 6 L 56-65).

Art Unit: 2121

Regarding claim 4, Pitigoi-Aron teaches wherein setting the property of the ambient light is configurable (see C 3 L 3-11).

Regarding claim 5, Pitigoi-Aron teaches wherein setting the property of the ambient light is configurable by a user preference (see C 7 L 29-43).

Regarding claim 9, Pitigoi-Aron teaches the lighting unit comprising a light armature (see C 3 L 13-20).
